68500 Wuenheim

+ Description

Wuenheim is a very pleasant village that stretches from a small valley to the plain at the foot of the Vieil Armand mountain, close to the towns of Soultz (2km) and Guebwiller (7km). Located at 320 metres above sea level on the tourist itinerary of the wine route, the Wuenheim owes its growth to wine making.

75% destroyed during the First World War due to its proximity to the Vieil-Armand (Hartmannswillerkopf) battlefield, this community has made return to a peaceful existence and provides visitors with a friendly welcome with its many departure points for MTB and hiking trails.

Its wine museum is an important stop in discovering the wine-making heritage of the region. Here visitors can see how the working methods and tools for winemaking evolved from 1900 to the present. And why not follow up with a stroll along the wine-growers' trail at Wuenheim and learn about wine-making methods and the different grape varieties during this educational walking tour.
