**68700 Wattwiller**

## Description

In the heart of the forest, on the heights of Wattwiller and at the foot of the Hartmannswillerkopf - Le Vieil-Armand, climb along the stream and admire the Siehlbaechle waterfall from the footbridge. The 'Siehlbaechle' originates from the slopes of the Molkenrain (name of the summit - Route des Crêtes towards the Grand Ballon) and has a torrential flow punctuated by waterfalls. It flows through the village and emerges at the Grandes Sources de Wattwiller bottling plant (extract from the commune of Wattwiller).
