+ Description

This room has a breathtaking view of the surrounding Kochersberg hillside and of course the garden! It is the most luminous, spacious and romantic room, with its original niche which allows an original view under the covered barn and makes a small living room...

A soft and flowery room with access via a beautiful 18th century staircase and an airlock communicating with the landing room. These two rooms can therefore form a suite. An art nouveau decoration option gives it its name!
