+ Description

The miniature garden train, also known as S'Molshemer Bahnele, is a curiosity to be discovered in the medieval town of Molsheim, located on the Alsace wine route some twenty kilometers from Strasbourg.

Lovers of railroad history have brought the train that once linked Saverne to Molsheim to life on a 1:20 scale, reproducing many of the buildings and engineering structures on the line.

It's a stroll down memory lane and a little history lesson.

Free access to the model every day.
