+ Description

Settled into a deckchair and equipped with virtual reality headsets, discover different views of Obernai and its ramparts, captured by a drone and commented live by volunteer guides from Obernai's Art et Patrimoine association. These images illustrate the town's rich heritage and the history of its ramparts through the ages. Comfortably seated in their seats, visitors can experience a unique sensation, discovering the town as if they were a stork in flight!

Presented by ADT, Drone Alsace and the tourist office.
