5pm: Screening of the documentary LE TEMPS DES FORÊTS by François-Xavier Drouet

A symbol of authentic nature in the eyes of urban dwellers, the French forest is undergoing an unprecedented phase of industrialization. With heavy mechanization, monocultures, fertilizers and pesticides, forest management is following the intensive agricultural model at an accelerated pace. From the Limousin to the Landes, from the Morvan to the Vosges, Le Temps des forêts takes us on a journey to the heart of industrial forestry and its alternatives. Whether a living forest or a wooded desert, today's choices will shape tomorrow's landscape.
