**Rue du château
67290 La Petite Pierre**

+ Description

Built in the 13th century, the castle of La Petite Pierre and its fortifications were modernized by Vauban in 1684.

The castle was then a strategic point allowing the control of this passage between Alsace and Lorraine.

Today, the Northern Vosges Regional Nature Park installed his seat, his « house » there.

However, the castle is currently closed for renovation for a period of two years.
