## + Description

The EDF Gerstheim power plant is now equipped with a fish pass based on the innovative design of the Strasbourg power plant, which was commissioned in 2006. It will allow fish, and in particular salmon, to return to Switzerland, in accordance with the commitments made by EDF as part of the European Rhine 2020 programme.

The development in a few figures:

400 metres long and 5,5 metres wide (natural pass) - 3400 m<sup>3</sup> of concrete and 270 tonnes of reinforcement - 35 000 m<sup>3</sup> of earthworks - 8 000 shrubs and plants along the pass - 15 million euros (overall budget including studies) financed by the French state and the Rhine-Meuse Water Agency.
